

# PATHFINDER

## AT A GLANCE

# About Pathfinder

We envision a world that values and invests in **leadership, health, and resilience for women and girls.**

*Girls building climate-resilient communities in Sindh, Pakistan.*

For nearly 70 years, Pathfinder has worked alongside women and girls in more than 100 countries, ensuring they have access to critical services and resources.

Our **women-driven, community-centered solutions** advance the health, leadership, and resilience of women and girls—creating opportunities for them to thrive. We place the experiences and voices of women and girls at the heart of our solutions, unlocking their leadership and innovation to transform the systems holding them back and build better future for all.

## WHAT WE DO

### Health

We enhance women's agency to make informed decisions about their health; bring life-saving care to women and girls; and build strong, resilient health systems.

- **Advancing rights, agency, and choice** among women, girls, and their communities.
- **Ensuring universal access to responsive points of care** delivery of quality essential health services.
- **Bolstering health system resilience and readiness** to withstand shocks and stressors.
- **Creating an enabling environment** in which individual-, community-, facility-, and system-level ideals can be achieved.

### Leadership

We ensure the voices and ideas of women and young people are put into action, and they have the resources they need to succeed.

- **Empowering women and youth economically** by increasing their participation in the formal economy.
- **Ensuring women's and young people's representation** on decision-making bodies.
- **Elevating women** in the workforce.
- **Contributing to policies** that support the agency and rights of women and girls.

### Climate Resilience

We apply locally led solutions to climate and health resilience, helping women and their communities adapt to the climate crisis.

- **Supporting climate-resilient health systems** that provide continuous services, reducing climate-related health risks.
- **Using integrated, human-centered approaches** that give communities the tools to lead climate adaptation.
- **Promoting the next generation of climate leaders and innovators** by building the leadership capabilities of women and young people.

*A nursing assistant in Uganda's Gomba district prepares to insert an implant to a client during an outreach in Ssali village.*

Despite massive cuts to foreign assistance, we continue to drive positive impact in the communities we serve.

#### OUR IMPACT IN FISCAL YEAR 2025

-  **12,691 health clinics** strengthened
-  **6 million+ contraceptive clients** served
-  **176,280 safe deliveries** supported
-  **1 million+ lifesaving child health services** given
-  **350,731 climate and health event attendees** engaged

#### Where We're Headed

Shaped by our legacy of advancing women-centered, community-driven solutions, we are doubling down on our commitment to women and girls through **Women&Co**—our new strategy and platform for women-powered innovation.

**Women&Co** brings together women to co-create solutions rooted in their lived experience. Launching first in Nigeria, we are working with groups of influential women to understand what challenges women face and bringing together the right sectors to collaborate on the co-design of responsive, sustainable, scalable solutions.
